

Assembly manual for Madrid XL wooden deck stairs and stringers

1- place your stringer in the correct direction.
The height of each step is 130mm (13cm)
The depth of each step is 390mm (39cm)

2- Fix the fastening materials of your choice to the wall and floor.
(Fastening materials for wall or floor are not supplied with the kit as they will depend on your type of wall/floor)

We strongly recommend our [galvanized steel mounting brackets](#). (supplied with stainless steel screws for wood)

You can also use the smaller [fastening brackets](#), but that is a less safe fixture.

It's almost impossible for us to advise you on wall and floor fastening materials as any wall/floor differs from another. You will find [more advice](#) scanning the QR-code.
Please be careful and assure a solid fixture of the stringers!
In case of any doubt, please contact a professional who can inspect your wall; safety first!

3- Fix the stringers to your fastening materials.
Do not allow more than 60cm between each stringer.
In case you have bought a Vinuovo deck stair kit:
Pending on the width of your stairs, the kit will contain: 2 or 3 stringers.
Width 60cm = 2 stringers
Width 120cm = 3 stringers
Width 180cm = 4 stringers
In case of intensive use, it's recommended to add additional stringers with a maximum distance of 40 cm between each stringer.

Assembly manual for Madrid XL wooden deck stairs and stringers

4- Screw the first plank on the first step with the RT-UT 5x60mm screws supplied with your kit. (use 2 screws per plank per stringer) Pay attention to align the plank with an equal distance on the left and right of the stringers.

Attention: as you should not allow more than 60cm between the stringers.

5- In the following order:

5a - fix the second plank on the first step

5b - fix the third plank on the first step

5c - fix the planks on step 2

5d - fix the planks on step 3

and so on until you have completed your stairs.

Congratulations, you have finished your stairs!

Waste disposal instructions:

Wood and steel are recyclable materials. Please check your local laws and regulations for recycling opportunities.

All the packaging materials are also recyclable, please follow the local regulations.
